1. Honeywell is to perform in accordance with an Northrop Grumman Innovation Systems-approved Quality Plan.

2. Mandatory inspection points (reference QAP 01Q002B) will be established by the resident NGIS Quality Representative.

3. The certification/data package (reference QAP 0Q1002C) will be in an NGIS approved Honeywell logbook format. The package will be submitted to the NGIS resident Quality Representative sufficiently in advance of the Pre-ship Review to allow proper evaluation of its contents, and at least 48 hours before shipment.

4. All nonconformances and waivers will be submitted to the resident NGIS Quality Representative for review and concurrence of classification (reference QAP 01Q000A, Discrepant and Nonconforming Articles clause). The submittal will include Honeywell's written justification for acceptance as well as cause and corrective action.

All Class 1 nonconformances and waivers will be contractually submitted to the NGIS Procurement representative for approval.

All Class 2 nonconformances and waivers will be contractually submitted to the NGIS Procurement representative for review.
