Workmanship Standard Criteria is required for this hardware. Workmanship standards promote standardized designs and fabrications practices to enhance assembly, durability, and reliability; and restrict the use of designs and manufacturing known to reduce those qualities. Supplier's approved workmanship standards shall be traceable to Military and Industry specifications or standards and approved by the supplier's cognizant discipline (design, engineering, manufacturing, and quality) organizations. Each workmanship standard shall contain at least the following information:

a. Design Criteria.

b. Tooling

c. Detailed acceptance or rejection criteria.

d. Personal training and qualification requirements.
