Items on this order shall be packaged in accordance with the requirement as described below.

- Items shall be heat sealed inside a moisture barrier bag containing desiccant and a humidity indicator card meeting the requirements of IPC/JEDEC J-STD-033. Kraft paper desiccant pouches are not allowed.
- There shall be adequate space between the items and the heat seal to allow opening and resealing the bag a minimum of three times.
- The bags shall be labeled according to IPC/JEDEC J-STD-033.
- There shall be no more than five tubes or one reel per bag.
- Tray, tube, and tape and reel materials shall be 125 degrees Centigrade tolerant.

Packaging labels shall identify the item by part number and lot code, date code, or serial number (as applicable).
